Paper Review Form

Reviewer Name: Shasha(Amy) Liu

Section I. Overview

A. Reader Interest

1. Which category describes this manuscript?
   ___Practice/Application/Case Study/Experience Report
   ___Research/Technology
   ___Survey/Tutorial/How-To

B. Content

1. Please explain how this manuscript advances this field of research and/or contributes something new to the literature.
   It proposes a brand new idea of a kind of web, where elements that appear in a document hold some meaning that can be automatically processed by a machine in some form of data gathering. It creates a way where information could be freely and easily exchanged.

C. Presentation

1. Does the introduction state the objectives of the manuscript in terms that encourage the reader to read on?
   ___Yes
   ___Could be improved
   ___No

2. How would you rate the organization of the manuscript? Is it focused? Is the length appropriate for the topic?
   ___Satisfactory
   ___Could be improved
   ___ Poor

3. Please rate and comment on the readability of this manuscript.
   ___Easy to read
   ___Readable - but requires some effort to understand
   ___Difficult to read and understand
   ___Unreadable

Section II. Evaluation

Please rate the manuscript. Explain your choice.
   ___Award Quality
Section III. Detailed Comments (provide your thoughts/criticism about the ideas in the paper; not only summarize the paper but have a critical look here)

It is such a nice paper that it uses vivid examples to illustrate many important aspects of Semantic Web, such as what is Semantic Web, what is the purpose of Semantic Web, what are the components of Semantic Web, etc. Through it, readers can have a view of the overall Semantic Web, which is brief and easy understanding but insightful.

Additional Comments:
1. Provide one aspect that you liked the most in this paper.
   It uses vivid examples to illustrate important aspects of Semantic Web, and it even involves many concepts within one example, like at the very beginning.

2. Provide one aspect that you disliked the most in this paper.
   It does not provide visuals or images to help to present. For example, it would be better if it gave an image to illustrate the relations between or among the aspects of the Semantic Web.

Section IV. Discussion Points (provide at least 3 discussion topics/questions related to ideas/techniques described in the paper; these will be used for discussions in the class).
1) We can find out all the concepts or aspects of Semantic Web in the very beginning example.
2) What is the relationship between or among different components of Semantic Web, like RDF, ontology and agent.
3) We can discuss what had been done of Semantic Web until 2001, and what have been done since 2001, and what can be done from now on.
