

Grammar Checker

Our Task:

We want to check a String and capitalize the first letter of each sentences.

Let's assume all the sentences end with a dot.

Write down your code below:

```
public class GrammarChecker {
```

```
    public static void main(String[] args) {
```

```
        String text = "Jack is a student! he is a good person. why do  
we asking these quesions! not sure? goodbye.";
```

```
// loop through the text and capitalize the first letter of each sentence using String  
methods
```

```
    }  
}
```
