

Our Task

1. Go through the characters of the given string.
 2. Find and count the number of emojis.
 3. Print the number of happy, neutral, and sad faces in the tweet.
 4. Complete the code below:
-

```
//defining and initializing other needed variables
int happyCount = 0;
int sadCount = 0;
int neutralCount = 0;

//complete the loop condition to walk through the Tweet
while ( ) {

//Add a branching statement here

}
System.out.println("#HappyFaces:" + happyCount + "\n" +
                  "#SadFaces:" + sadCount + "\n" +
                  "#NeutralFaces:" + neutralCount );
```
